**E-content:** This is a mind map for the topic 'Graphical Representation of Data'.

E-content type: Image

What does it explains?

This mind map explains how data can be represented graphically. It explains that data can be represented graphically through bar graph, histogram and frequency polygon. Also, it tells briefly about bar graph, histogram and frequency polygon.

How this e-content can be used?

This e-content can be used to give introduction to the learners how data can be represented graphically. Theory can be simultaneously explained with diagrams in order to give better understanding of the graphs.
