

QUIZ: CLASSIFICATION

In a biology laboratory freshly collected specimens were mounted on glass plates, and kept in specimen jars containing preservative solution.

Now the labeling is to be done for each specimen giving the scientific name, common (Vernacular) name and important characters of identification.

A list of characters is given below:

Aquatic	Terrestrial	Amphibious	Scales present	Lays eggs	Warm blooded
Cold blooded	Heart has only three chambers	Gills present	Lays eggs with tough coverings	Lungs present	Heart has only two chambers

Which of the above characters would you use for specimens belonging to Pisces? Fill in the boxes given below

Answers:

Aquatic
Cold blooded
Heart has only two chambers
Scales present
Lays eggs
Gills present

Note for the teacher: Teacher can make similar type of questions for other groups of animals or plants.
