

## 2. Meta data of E- Content (Pre production)

S. N.	AREA OF META DATA	TO BE FILLED BY CONTENT GENERATOR(S)
1	Topic	Volcano
2	Subject	Geography
3	Topic connected which area of subject?	Our Changing Earth
4	Class/ Level	VII
5	Objectives	An activity has been given to help learners understand various parts of a volcano
6	Summary	A volcano is an opening in the earth's crust through which molten material, volcanic ash, gases escape from a magma chamber below the earth's surface. A diagram helps to understand various parts of a volcano and how it erupts.
7	Key Words	Volcano, magma, lava, vent, crater
8	Team of content persons	Dr. Tannu Malik
9	Subject Coordinator	Dr. Tannu Malik
10	CIET Coordinator	

**Activity:** In the given box, names of various parts of a volcano have been given. Drag and label them on the given diagram

Magma, ash, vent, crater, magma chamber, crust, lava, mantle
--

*Note: CIET's technical help is needed to remove some labels and renumbering from this diagram.*
