

### 3. Meta data of E- Content (Pre production)

<b>S. N.</b>	<b>AREA OF META DATA</b>	<b>TO BE FILLED BY CONTENT GENERATOR(S)</b>
1	Topic	Sea Arch
2	Subject	Geography
3	Topic connected which area of subject?	Major landforms of the Earth
4	Class/ Level	VII
5	Objectives	To identify and understand the processes involved in the formation of sea arch.
6	Summary	The continuous striking of waves on coastal rocks results in development of cracks in them. Over time these cracks become larger and wider and caves are formed in them. With further passage of time, the erosional action of waves results in collapse of some of the walls of the cave and roof and some part of this cave remains intact. These are called Coastal Arches.
7	Key Words	Coastal landforms, arch , erosional landforms
8	Team of content persons	Mrs. Bharti Malhotra
9	Subject Coordinator	Dr. Tannu Malik
10	CIET Coordinator
