

1. Meta data of E- Content (Pre production)

S. N.	AREA OF META DATA	TO BE FILLED BY CONTENT GENERATOR(S)
1	Topic	Breaking up of Rocks
2	Subject	Geography
3	Topic connected which area of subject?	SOIL
4	Class/ Level	VII
5	Objectives	To explain breaking up of rocks due to biological weathering which leads to the formation of soil.
6	Summary	Formation of soil depends on many factors. Growing of vegetation in the cracks of rocks is one factor. Plant roots exert pressure on the rocks and leads to breaking up of rocks which gradually lead to the formation of soil.
7	Key Words	Soil, breaking of rocks, biological weathering
8	Team of content persons	Ms. Renuka Sharma
9	Subject Coordinator	Dr Tannu Malik
10	CIET Coordinator	

Protrusion of plant roots leads to breaking of rocks and further formation of soil.
