

## Resource 2

### E-Contents in Geography for Secondary Stage for the month of August

S.NO.	Area	Content
1	Topic	Plate tectonics
2	Subject	Geography
3	Topic connected which area of subject?	Physical Features of India
4	Class/ Level	IX
5	Objective	To make students aware about different types of plate boundaries.
6	Summary	There are three types of plate boundaries. Divergent boundaries, Convergent Boundaries and Transform Boundaries. Broadly ,the plate movements are classified into three types.. While some plates come towards each other and form convergent boundary. Some plates move away from each other and form divergent boundary. In the event of two plates coming together they may either collide and crumble or one may slide under the other. At times, they may also move horizontally pass each other and form transform boundary.
7	Key Words	Plate tectonics, plate movement, Convergent boundary, divergent boundary, transform boundary, Subduction zone
8	Team of content persons	Dr Aparna Pandey
9	Subject Coordinator	Dr. Aparna Pandey
10	CIET Coordinator	-

Videos on Plate boundaries-

<https://vimeo.com/album/2136020/video/52703458>

<https://vimeo.com/album/2136020/video/52707891>

**Activity:**

Observe the videos and show different types of Plate boundaries through diagrams.
